APPLICATIONS

Typical applications for the BW™ RigRat deployment include work in confined spaces, hot work, planned maintenance, repairs and short-term environmental monitoring.

Hot Work / CSE
Welding in any small or crowded area with limited access and little or no airflow or ventilation is dangerous
Continuous air monitoring may be necessary during welding or while in confined space
Confined Space

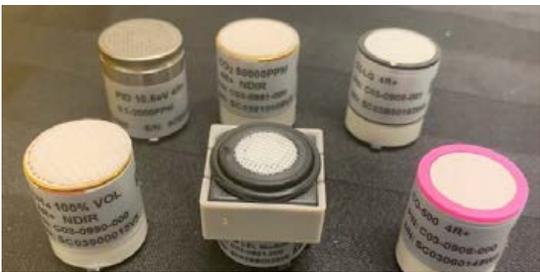

Refinery and Chemical Plant
Turn arounds and shutdown require temporary and location sensitive monitoring
Planned Maintenance

Utility Workers & Trenchwork
Hazardous atmospheres should be evaluated prior to entry and during work based on containment(s) present.
Repairs

Wastewater Facilities
During normal operations, toxic hazard risks exist. Workers will need mobile area monitoring
Temporary Monitoring

Fence Line Deployment
Protects workers from upwind environmental threats as well as the community from potential hazard due to on-site work
